

# PowerBoss Collector 34 Walk-Behind Sweeper

The Collector 34 walk-behind sweeper has excellent sweeping performance on all types of floors including carpet and hard floors. This sweeper is extremely economical, easy to operate and gives you dust-free sweeping. The high efficiency dust filter system provides for a cleaner environment as debris is removed. The large 18.3 ft<sup>3</sup> panel filter system captures fine dust and drops it directly into the hopper. The dust vacuum suction can be shut off when sweeping wet areas so that the filter won't be damaged or clogged. A heavy-duty ABS cover opens wide for easy access to interior components. The cover has an automatic shut-off for safety.

## Specifications

<b>Batteries</b>	Two (2) 6V 275 AH batteries
<b>Area Performance</b>	36,600 ft <sup>2</sup> per hour – actual
